

UID Registration Service

Meeting the standards for UID compliance can be a daunting task. That's why Metalcraft makes it easy for you with a complete solution! For years we have provided you with UID nameplates and labels, but now we are taking it a step further to offer you both data management and UID Registration services.

Just think you can have the same company that produces your UID compliant nameplates and labels also submit and register UII's for you - truly making Metalcraft a one-stop shop for complete UID compliance.

We take care of three key components:

- **Durable Products** - we offer photo anodized foil labels and metal nameplates, subsurface printed polyester labels, laser engraved nameplates and ceramic-on-stainless steel nameplates.
- **Quality Information** - all UID information is verified and validated to ensure compliance with UID and Mil STD 130 specs.
- **Registration/Submission Service (NEW!)** - submit UII's and related Pedigree data for End Items, Government Property, Legacy Assets and Virtual UII's Embedded Items to UID Registry.

Remember simply tagging the asset doesn't equal compliance. The information needs to be sent to the UID Registry in order for the DoD to track the items. Failure to register items may delay payments or even jeopardize future contracts. By offering the submission and data management services Metalcraft helps customers bridge the gap in their current process.

UID is an involved process, but Metalcraft knows all the ins and outs - what to send, where to send it, and who to send it to. Metalcraft is your key to complete UID compliance!
