

How Can Metalcraft Help?

Using Metalcraft products in your fixed asset inventory provides the foundation for an effective automated asset management system. The products described in this brochure can track assets found in a classroom, science lab, cafeteria or even administration office – making the process more efficient by saving you time and money!

Foil Bar Code Labels

A thinner profile allows these versatile anodized aluminum labels to easily conform to radius surfaces while still resisting abrasion, solvents, and high temperatures.

Premium Polyester Bar Code Labels

Designed for a variety of applications, this multi-purpose label is pliable enough to conform to curved surfaces, yet durable enough to resist caustics, acids, and solvents.

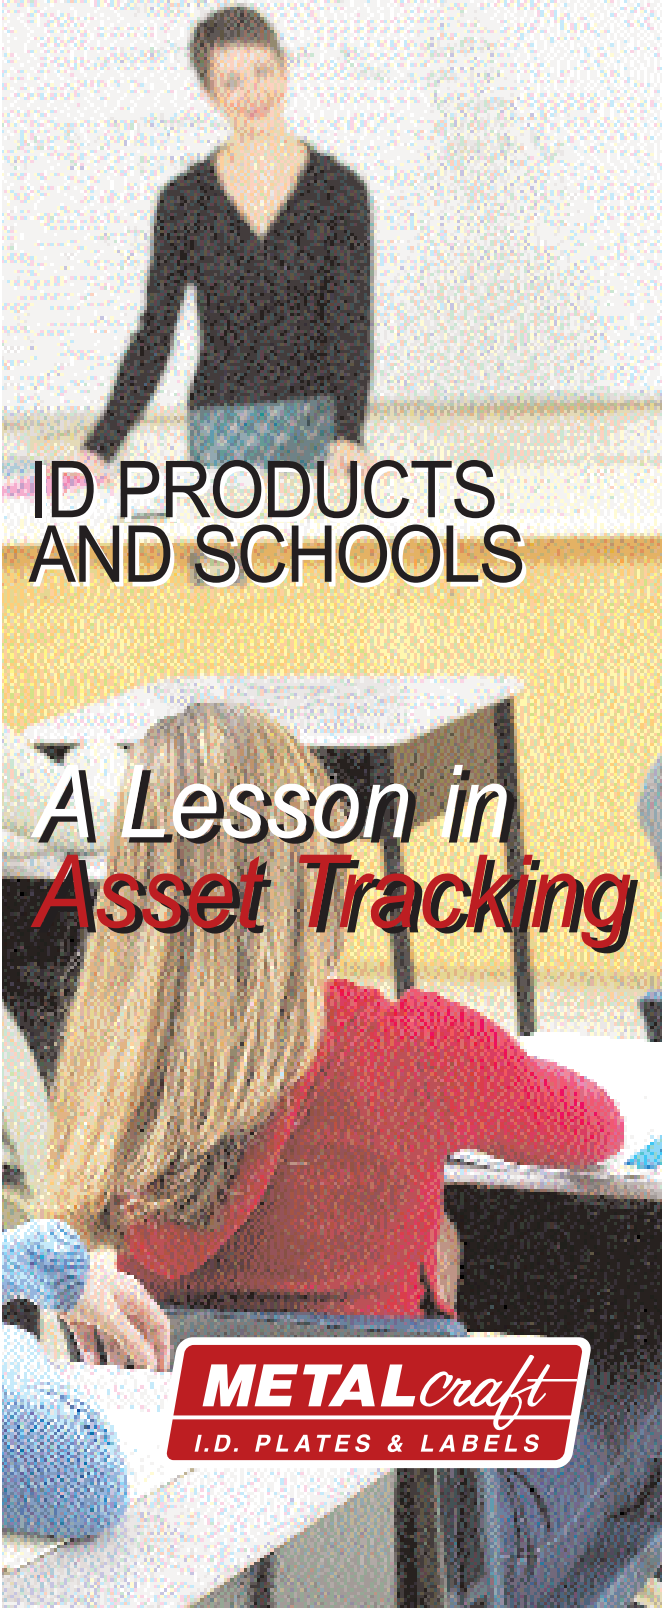

Destructible Labels

Made from a destructible material that tears apart if someone tries to remove it, these labels offer customers a unique way to track their property while protecting the asset from unauthorized transfer.

Tamper-Evident Labels

Designed to leave the word “VOID” on the surface of the asset if someone tries to remove it, these nontransferable labels discourage theft while effectively tracking assets.

ID PRODUCTS AND SCHOOLS

A Lesson in Asset Tracking

Simplify asset tracking with nameplates and labels from Metalcraft.

Tracking equipment and supplies is a challenge in any school – from elementary to college. Record keeping can easily become a nightmare due to misplaced assets, forcing busy faculty and staff to waste precious time tracking down audio visual devices, laboratory equipment or other supplies. If the equipment can't be found, many schools stretch their already tight budgets to unnecessarily purchase or rent replacements.

Would you like to...

- Increase efficiency and accuracy in asset management?
- Reduce unnecessary equipment purchases?
- Track depreciation of equipment?
- Discourage theft of school property?
- Maintain accounting records in accordance with GASB 34?

“Your nameplates make it easier to locate equipment at each center and office.”
