EZ-Peel Barcode Labels enable the user to reposition or take off the tiny barcode label without leaving any adhesive residue behind.

The robust barcode sticker effortlessly adapts to curved surfaces and is perfect for reusable freight containers, inventory racks, work-in-progress operations, or any other scenarios where items require frequent relabeling.

What is an easy peel label?

An easy peel label is a type of label designed for quick and effortless removal from a surface. These barcode stickers typically feature a special adhesive backing that allows them to be peeled off smoothly and cleanly without leaving residue or damaging the surface underneath.

Easy peel labels are commonly used for temporary or removable labeling in various applications. These applications include product packaging, shipping labels, promotions, and office supplies. These barcode stickers are great for users who need

Features	Special adhesive allows user to remove label without leaving a messy residue Flexible polypropylene material easily conforms to radius surfaces Custom colors available at no additional charge
Product Print Options	Barcode . Data Matrix . QR Code . Serial Number . Text
Product Functionality	Abrasion Resistance . Chemical Resistance . Heat Resistance
Popular Applications	Calibration . Inventory . Shipping containers . Work-in-process
Category	Asset Tracking . Plastic Barcode Labels

to remove them easily. They are a good option for situations that require repositioning or temporary labeling.

Why do people need small barcode labels?

People often need small barcode labels for various reasons, including:

1. Inventory Management: Small barcode labels are essential for tracking inventory items efficiently in warehouses, retail stores, and other business environments. Each item can be labeled with a unique barcode, allowing for accurate and streamlined inventory management processes.

2. Product Identification: Small barcode labels help identify individual products or items, making it easier for retailers, manufacturers, and consumers to quickly access product information, such as pricing, specifications, and expiration dates.

3. Asset Tracking: Organizations use small barcode labels to track and manage assets, such as equipment, tools, and machinery. By affixing barcode labels to assets, they can easily monitor their location, status, and maintenance history.

4. Supply Chain Management: Barcodes play a crucial role in supply chain management by providing visibility and traceability of products as they move through the supply chain. Tiny barcode labels enable efficient tracking of items from production to distribution to the end customer.

5. Point-of-Sale (POS) Systems: Small barcode labels are scanned at the point of sale using barcode scanners to quickly and accurately ring up

purchases. They facilitate fast and efficient transactions, reducing checkout times and improving customer satisfaction.

6. Identification Cards and Badges: Tiny barcode labels are used on identification cards and badges for access control, time tracking, and security purposes in workplaces, schools, events, and healthcare facilities.

7. Library and Document Management: Libraries and organizations use small barcode labels to catalog and track books, documents, and other media. Each item is assigned a unique barcode that can be scanned to retrieve information about the item and its location.

Overall, small barcode labels are essential for automating data capture, improving accuracy, and streamlining operations across various industries and applications. They provide a cost-effective and efficient solution for tracking, identifying, and managing a wide range of items and assets.

Specifications Data

Material	.002" thick polypropylene
Bar Code & Serialization	Bar code and human-readable equivalent is digitally printed – providing excellent clarity and easy scanning. Code 39 is the standard symbology with a range of 2.7 to 9.4 CPI (characters per inch). Optional linear and 2D symbologies available. Although this product is primarily marketed as a bar code product, we can produce it with human-readable numbers only or unserialized.
Label Copy	The label copy may include block type, stylized type, logos or other designs. All copy, block type, stylized type, logos, designs, and bar code are subsurface printed.
Colors	Standard colors include black, red, yellow, green, dark blue, purple, orange or blue. Custom spot colors are also available at no additional charge. Due to contrast needed for the bar code scanner, all bar codes are black.
Standard Adhesive	.001" thick removable/repositionable adhesive that provides good bonding to metal, wood, most plastics and painted surfaces
Sizes	2" x .75"; 1.75" x .875"; 2.75" x 1.25"
Packaging	Shipped on convenient rolls with scrap matrix removed for ease of removal. Cartons are clearly marked to indicate serial numbers of labels.
Shipment	11 business days

Chemical Testing

Chemical Soak Test: This rating measures the effect on various labels after being exposed to chemicals listed below for a 24 hour soak.

Chemical Test Data

Test Conditions	Rating
Water	no effect
Glass Cleaner	no effect
Bathroom Cleaner	no effect
Alcohol	no effect
Acetone	delaminated
Sodium Hydroxide	no effect
Nitric Acid	no effect
Hydrochloric Acid	no effect
Brake fluid	no effect

Destructive Testing

Destructive Test Data

Temperature Testing

Heat Test: Adequate ratio for bar code scanning and removability with intermittent heat exposure to 250°. Not repositionable when heated above 100°F.
