

## Features

Perfect for Data Exchange Applications  
Security / Payment Transaction Options  
Close Range Authentication  
Available in Multiple Sizes & Styles

## Product Print Options

Barcode . Data Matrix . QR Code . RFID

## Product Functionality

## Popular Applications

Theme parks . Trade show . Construction / Tool Tracking

## Category

Access Control . RFID Tags

Using NFC-enabled tags from Metalcraft in conjunction with an NFC-enabled cell phone, the power of the tag is truly in your hands. NFC is a wireless communication built on the principles of RFID which allows for additional security over "standard" RFID. In addition, NFC allows for the ability to have two-way communication between devices. The primary application is data exchange; however, the possibilities are endless!

## Specifications Data

<b>Material</b>	.002" polyester
Serialization	Copy only, serialized/unserialized numbers and bar code with human readable numbers (RFID programming included)
Colors	Multi Color Printing Available
