

RFID Inlay Assembler

A great opportunity awaits! We are looking for someone who wants the flexibility, freedom, and desires taking on challenges of working for a startup company with the backing of a solid, stable 70-year-old parent company. Become a member owner of a high-tech company that is at the forefront of the IOT/RFID space.

Metalcraft, a 70-year-old employee-owned company headquartered in Mason City, Iowa, is seeking an RFID Inlay Assembler to join our team in Ames, IA. Metalcraft is a values-driven, industry leader providing innovative identification solutions coupled with outstanding service and support.

The RFID Assembler is responsible for production of RFID inlays including setup, operation, and routine preventative maintenance of automated roll to roll manufacturing line.

- Troubleshooting during production, auditing, and testing of RFID inlays during and after production. Following procedures, standards, and technical drawings, you will be using measuring devices and lean tools to provide high quality products and keeping costs in mind.
- A job where you stay busy, using your mechanical aptitude and experience working with computer-controlled machinery to perform change over operations, assisting in producing customer prototypes and orders, you will stay busy! You must have the ability to lift 40 pounds and be able to stand for long periods of time.

As a member owner – You can provide valuable input!

- A self-motivated, goal directed, self-starter able to define and pursue a course of action consistent with corporate goals and the production development of this new product
- A "can do," flexible, and team-oriented approach with an interest in taking on various additional projects as requested. You are ok with being flexible in hours to meet customer demands.
- Comfortable with performing a wide range of responsibilities, from thinking broadly to executing detailed tasks.
- You are comfortable working with teams, you will work closely with the RFID Technician on day-to-day activities as well as the Engineering team on product design, equipment function, and process development. Your input will be valued!

Education:

- High School including Basic Math with aptitude in fractions and decimals.

Why be part of the Metalcraft?

In addition to being rock-solid and rapidly growing, Metalcraft is recognized throughout North Iowa as a Top Workplace. We are an Employee-owned company (ESOP) that offers competitive pay, comprehensive benefits, an advanced manufacturing environment, and a challenging/rewarding team-based culture.

If you are looking for a rewarding career with a company that values your abilities, come grow with us!
