

RFID Inlay Technician

A unique opportunity for an energizing, entrepreneurial problem solver that wants to have the flexibility and freedom of working for a startup company with the backing of a solid, stable 70-year-old parent company. Become a member owner of a high-tech company that is at the forefront of the IOT/RFID space.

Metalcraft, a 70-year old employee-owned company headquartered in Mason City, Iowa, is seeking an RFID Inlay Technician to join our team in Ames, IA. Metalcraft is a values-driven, industry leader providing innovative identification solutions coupled with outstanding service and support.

The RFID Inlay Technician is responsible for the production process of RFID inlays including setup, operation, troubleshooting, and routine preventative maintenance of automated roll to roll manufacturing line. The right candidate will review new product designs for manufacturability, produce customer prototypes and orders, and work with and maintain standard work procedures.

You value personal development.

- A self-motivated, goal directed, self-starter able to define and pursue a course of action consistent with corporate goals and the production development of this new product
- A "can do," flexible, and team-oriented approach with an interest in taking on various additional projects as requested
- Comfortable with performing a wide range of responsibilities, from thinking broadly to executing detailed tasks.

You value team.

- You provide training to other members on RFID day to day tasks.
- Other key duties include training of inlay assemblers and being on call to assist troubleshooting.
- Create procedures and quality standards while using lean tools to eliminate non-value-added work from inlay production operations.

You value communication.

- You embrace that you will be collaborating with engineering and manufacturing functions to ensure quality production parts are being met.
- The right candidate will work closely with procurement to ensure proper raw materials are available when needed.

Education:

- Bachelor's degree in engineering, MIS, Industrial technologies, or equivalent training preferred
- Minimum requirement of two-year technical degree

Why be part of the Metalcraft?

In addition to being rock-solid and rapidly growing, Metalcraft is recognized throughout North Iowa as a Top Workplace. We are an Employee-owned company (ESOP) that offers competitive pay, comprehensive benefits, an advanced manufacturing environment, and a challenging/rewarding team-based culture.

If you are looking for a rewarding career with a company that values your abilities, come grow with us!
